“If I go for it, I also can!”

Yamaguchi Rosana Emi (Brazil)

I came from Brazil to Japan 8 years ago. As soon as I got here I was introduced to a lot of new things. The most impressive is the public transport; it's safe and always on time.

But there were problems too. For me, the greatest was the fact that I couldn't communicate well. Depending on who you are talking to, you have to change the way of talking, such as, if someone is older, like your boss, your senior, etc.

Fortunately, now I can express myself better than before. Now I am studying at AIS the right way to read, write and speak Japanese. Thanks to this, 2 or 3 weeks ago, I was able to understand my workplace notices. I am thankful to people who have been teaching me until today, and I've got the feeling that “if I put some effort into it, I also can read and write Japanese”.

I look forward to making your acquaintance.
